

## SQF Packaging Food Safety Management System

This is an ideal package for Food Packaging Manufacturers looking to meet SQF Code – A HACCP-Based Supplier Assurance Code for the Food Industry.

You cannot buy an SQF documentation system template as comprehensive as this anywhere on the internet so ensure your Food Safety Quality Management System meets SQF Code with our easy to use SQF Packaging Food Safety Quality Management System.

Included in our SQF Packaging Food Safety and Quality Management System Package:

- ✓ Food Safety Management System Procedures
- ✓ Food Safety Management System Record Templates
- ✓ HACCP Manual
- ✓ Interactive HACCP Training
- ✓ Interactive HACCP Examination
- ✓ Validation Record Templates
- ✓ Verification Record Templates

## SQF Packaging Food Safety Management System

- ✓ Internal Auditor Training
- ✓ SQF Code Training Modules 2 & 13
- ✓ Laboratory Quality Manual
- ✓ Free online support via e-mail

Included with this comprehensive SQF Packaging Food Safety and Quality Management System package is an Implementation Workbook. The workbook is divided into 8 steps that are designed to assist you in implementing your food safety management system effectively:

- ✓ Step One: Introduction to the SQF Code
- ✓ Step Two: Assessment of Food Safety Fundamentals
- ✓ Step Three: Senior Management Implementation
- ✓ Step Four: Food Safety Quality Management System
- ✓ Step Five: Training
- ✓ Step Six: Project SQF Implementation
- ✓ Step Seven: Internal Auditing Training & Checklists
- ✓ Step Eight: Final Steps to SQF Certification

**Packaging Food Safety Quality Management System**

Our Food Safety Management System contains a comprehensive SQF Code documentation package. In this bundle of certification tools you will find:

- ✓ Food Safety Quality Manual containing a set comprehensive procedures and an extensive range of record templates.
- ✓ HACCP manual containing food safety procedures and HACCP Instructions.
- ✓ Laboratory manual including sample procedures and records.

You can choose to totally implement the procedures supplied or pick those that are applicable to your process.

The Food Safety Quality Manual contains 66 comprehensive top level procedures templates that form the foundations of your Food Safety Management System so you don't have to spend 1,000's of hours writing compliant procedures:

# SQF Packaging Food Safety Management System

## Packaging Food Safety Management System Procedures

### AFC QM 2.1.1 Food Safety and Quality Policy and Objectives

The company's food safety and quality policy is to provide consistent products and services of the highest standards of performance and reliability. By achieving this goal the company will consistently satisfy the mutually agreed needs and expectations of its customers, achieve business success and ensure that our products are always safe to consume and conform to statutory and regulatory requirements.

Senior Management are committed to implementing and maintaining an effective SQF system and to support its ongoing improvement through adoption of a food safety quality management system containing food safety policies and procedures that meet legal requirements, and industry best practices as reflecting the competence of the company to customers and independent authorities. As part of this commitment Senior Management have established processes to improve the effectiveness of the SQF System to demonstrate continuous improvement.

The Company recognises that a successful food safety culture can be achieved only by following safe working practices and procedures developed through effective hazard analysis, training and experience. In order to achieve these aims, a robust Hazard Analysis Critical Control Points System (HACCP) has been introduced following a full hazard analysis of all food related operations. All instructions and control mechanisms within HACCP are designed to control any risk to food safety.

To ensure success of this policy Senior Management are directly responsible for food safety and quality by ensuring adequate: organisation and support, equipment and facilities, training and education of all employees, reviewing and auditing performance, and driving continuous improvement. The senior management ensure adequate resources are available to achieve food safety and quality objectives and to support the development, implementation and maintenance and ongoing improvement of the SQF System. Detailed organisational arrangements and food safety responsibilities for all levels of management are contained in the food safety and quality manual.

Achievement of this policy involves all staff being individually responsible for the quality of their work, resulting in a continual improvement culture and working environment for all. All employees are provided with the food safety training necessary to enable them to perform their tasks and are responsible for ensuring that they do so in a hygienic manner so that the safety of the food they handle is not put at risk. All employees are required to

### AFC QM 2.1.3 Food Safety Quality Management System

#### Introduction

The company has planned, established, documented and implemented a food safety and quality management system for the site, which is maintained in order to continually improve its effectiveness in accordance with legislation, international standards and best industry practice. The company has planned and developed the processes that contribute to meeting the requirements of these standards and producing safe products.

#### Scope

The scope of the Food Safety Quality Management System includes all product categories, processes and activities conducted on site. These requirements are aligned with the policies and objectives of the site and include those of the SQF Code.

#### Due diligence

The Food Safety Quality Manual demonstrates due diligence of the company in the effective development and implementation of the food safety management system. These documents are fully supported by the completion of the records specified in this manual for the monitoring of planned activities, maintenance and verification of control measures and by taking effective actions when non-conformity is encountered.

#### Food Safety

The company is committed to supplying safe products for consumption. As part of this commitment, all products and processes used in the manufacture of food products are subject to food safety hazard analysis based on the Codex Alimentarius guidelines to the application of a HACCP system. All food safety hazards, that may reasonably be expected to occur, are identified by this process and are then fully evaluated and controlled so that our products do not represent a direct or indirect risk to the consumer. New information regarding food safety hazards is continually reviewed by the Food Safety team to ensure that the Food Safety and Quality Management system is continually updated and complies with the latest food safety requirements.

Should the company be required to outsource any process that may affect product conformity to the defined standards of the Food Safety Quality Management System.

### AFC QM 2.4.3 Food Safety Plan

#### Introduction

The company is committed to supplying safe products for consumption. As part of this commitment, all products and processes used in the manufacture of food products are subject to hazard analysis based on the Codex Alimentarius HACCP principles and the requirements of SQF Code.

The Food Safety Manual demonstrates due diligence of the company in the effective planning, development and implementation of the food safety management system. These documents are fully supported by the completion of a Food Safety plan and the records specified in the manual for the monitoring of planned activities, maintenance and verification of control measures and by taking effective actions when non-conformity is encountered. All food safety hazards, that may reasonably be expected to occur, are identified by this process and are then fully evaluated and controlled so that our products do not represent a direct or indirect risk to the consumer.

The Food Safety Management System is fully supported by established verification procedures and validation of the control measures/combination of control measures that are implemented through the operational pre-requisite programmes or the Food Safety plan.

#### Management Commitment

We are a leading food company committed to produce safe and legal products in line with legislation and to continuously improve our standards of hygiene, quality and safety in relation to both our product range and the environment in which we manufacture these products.

#### HACCP principles

HACCP is a system, which identifies specific hazards and implements measures for their control. All the HACCP's contained in this manual have been developed taking legislation requirements into consideration and using the seven basic processes detailed below: -

### AFC QM 13.2.8 Calibration

#### Introduction

The company has established, documented and implemented a Calibration System for monitoring and measuring equipment on site, which is maintained in order to ensure conformity to product requirements in accordance with international standards and best industry practice. The processes that contribute to meeting the requirements of these standards have been determined.

#### Scope

The scope of the Calibration System includes all equipment used to measure, monitor and manufacture product on site and activities conducted on site.

These requirements are aligned with the policies and objectives of the site and include those of the SQF Code.

#### Procedure

The company maintains this procedure for the calibration of monitoring and measuring equipment on site.

An inventory of all monitoring and measuring equipment critical to product quality and safety or whose results can affect the conformity of product requirements is maintained by the Engineering Manager. Each piece of equipment is labelled with a unique identification code which is also used to identify it on all relevant documentation including calibration certificates.

All of the Measuring and monitoring Equipment is subject to regular servicing and preventative maintenance as per the Preventative Maintenance Schedule for Critical Equipment. The Equipment is also covered by maintenance contracts with the supplier. Records of all work including maintenance, servicing and calibration of all equipment are maintained and retained on site for a minimum of 3 years.

## AFC Prerequisite Audit Checklist

Audit Location:		
Date:		
	Satisfactory Yes / No	Findings & Action Taken
<b>Delivery, Inspection and Supplier Approval</b>		
Are raw materials supplied approved?		
Are raw suppliers and approved for approval?		
Are records of supplier history available?		
Are raw material specifications available?		
Are checks on raw materials carried out on delivery?		
Are delivery notes checked for each delivery and retained?		
Are storage conditions correctly indicated?		
Is the water from a satisfactory source or bottled?		
Are there effective packaging removal procedures in place?		
Are references appropriately stored immediately?		
<b>Raw Preparation</b>		
Are there raw ingredient preparation controls in place?		
Are there controls in place to control method, time and temperature?		
Are there batch records in place (date, recommended dosing, volume and ingredients used)?		
Are there effective systems in place to prevent contamination of vegetable products with meat?		
Are there effective systems in place to prevent contamination of veggie products with non-veggie ingredients?		
Are there effective systems in place to prevent contamination of products from the "raw floor" for products preservatives or colourings?		
Are there effective systems in place to prevent contamination of raw free products with meat?		
Are there effective systems for separation of raw and cooked preparation areas?

Food Safety Quality Management System Verification  
Records

**Glass Policy Verification Record**

Glass Policy Verification Audit	
Auditor Name	
Date	
Site Standards	Audit Findings
Are all employees including agency staff, visitors and contractors familiar with and follow the Glass & Perspex Policy?	
Is the use of glass on the manufacturing site minimised?	
Wherever possible are alternative materials to glass used?	
Are all personnel prevented from taking glass into production areas?	
Is there a comprehensive list of all glass (and glass-like materials) in each department for all factory production areas?	
Are these items checked every day by the Supervisor responsible for the department at the start of production and at the end of production to ensure they are not damaged?	
Are the results of the inspection recorded on a Glass Register and signed off?	
Is any breakage of glass occurring reported and dealt with immediately using the glass breakage procedure and record?	
Is glass used on food vessels such as 'sight glass' in viewing ports and vessel level indicators replaced where possible with suitable alternative materials which are capable of withstanding the production process?	
Where glass cannot be replaced due to process pressures and temperatures, is it 'toughened' and conform to British Standard 3463 (1975) 1988

## Senior Management Project Planner

Using the Excel Project Planner Senior Management can adapt the template supplied with the system to establish a Project Plan.

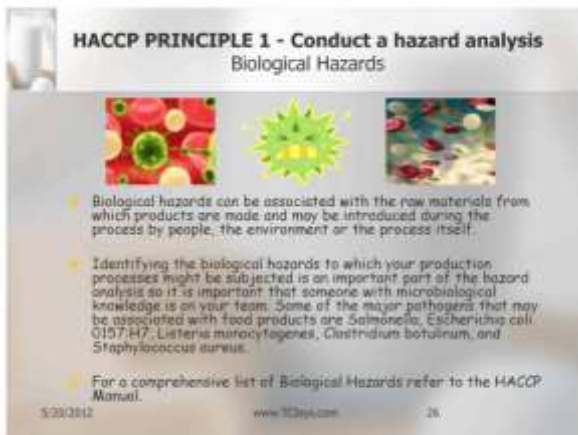

SQF Code Food Safety Management System

Project Planning Tasks	Responsibility	Comments	Due Date for Completion	Date Completed
1) Senior management demonstrate a commitment to food safety	Senior Management Team	Completed in Step 3	10/1/10	9/1/10
2) Senior management issue a food safety policy	Senior Management Team	Completed in Step 3	10/1/10	9/1/10
3) Senior management establish food safety objectives	Senior Management Team	Completed in Step 3	10/1/10	9/1/10
4) Senior management define the scope and boundaries of the FSMS.	Senior Management Team	Completed in Step 3	10/1/10	9/1/10
5) Senior management plan the establishment of the FSMS.	Senior Management Team	Completed in Step 3	10/1/10	9/1/10
6) Senior management provide adequate support to establish the FSMS.	Senior Management Team	Completed in Step 3	10/1/10	9/1/10
7) Senior management ensure there is adequate infrastructure and work environment.	Senior Management Team	Completed in Step 3	10/1/10	9/1/10
8) Senior management appoint a food safety team leader/SQF Practitioner	Senior Management Team	Completed in Step 3	10/1/10	9/1/10
9) Senior management appoint the food safety team.	Senior Management Team	Completed in Step 3	10/1/10	9/1/10
10) FSMS responsibilities and authorises are documented and communicated	Senior Management Team	Completed in Step 3	10/1/10	9/1/10
11) Food safety communication systems are put in place	Senior Management Team	Completed in Step 3	10/1/10	9/1/10

## HACCP Training

An interactive and illustrated PowerPoint HACCP training presentation is supplied to train your food safety team in the preliminary steps to a Hazard analysis, the principles of HACCP and how to utilise the HACCP calculator in implementing your HACCP system.

**Training Software**

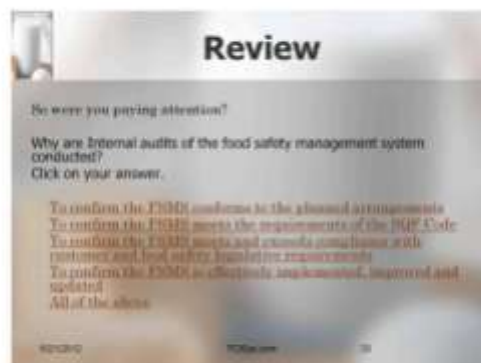

The interactive and illustrated PowerPoint HACCP training presentation is supplied with training software.

We have provided a HACCP Multiple choice exams evaluate your staff's progress with graphic certificates to print out.

Internal Auditing Training & Checklists

Internal Auditor Training - An interactive and illustrated Internal Audit training presentation to train your Internal Audit procedure.

**Free Online Support until you achieve Certification**

We provide online support and expertise via e-mail to answer your questions and assist you in developing your SQF Packaging Safety and Quality Management System until you achieve.

## **Benefits of SQF Certification**

Food Safety Management System Certification can be seen by some Senior Managers as an unnecessary and bureaucratic activity. For this reason Senior Management need to understand the benefits of an effective Food Safety Management System:

- ✓ A Food Safety Management System structured with the principles of HACCP will have a clear focus on food safety which is a fundamental requirement of any food business
- ✓ An effectively implemented and applied HACCP based Food Safety Management System will improve customer confidence in the safety of food
- ✓ A Food Safety Management System based on HACCP takes a preventative approach that is designed to reduce and liabilities.
- ✓ An effective Food Safety Management System demonstrates management commitment to the supply of safe products.
- ✓ Food Safety Management System Records provide evidence of due diligence
- ✓ HACCP based Food Safety Management Systems can be combined with a quality management system to provide a Food Safety based system also considers quality.
- ✓ Level 2 SQF Certification gives all interested parties a clear message that the organisation is serious about Food Safety

## SQF Packaging Food Safety Management System

In order to ensure a Food Safety Management System is effectively implemented management within an organisation need to understand:

- ✓ The benefits of a Food Safety Management System
- ✓ How lack of an effective Food Safety Management System can cause food borne illness
- ✓ That a HACCP based Food Safety Management System really is a minimal system to ensure maximum control
- ✓ That a HACCP based Food Safety Management System enables businesses to optimise the use of resources by control of CCPs in an logical manner

The SQF Packaging Food Safety Quality Management System has been designed to overcome the problems that can be encountered when implementing an effective system including:

- ✓ Lack of pre-requisite programmes
- ✓ Over-complex and unmanageable systems with too many critical control points (CCPs), partly resulting from a misunderstanding of the role of prerequisite hygiene programs (PRPs) and an inability to conduct proper hazard analysis.
- ✓ Ineffective monitoring and corrective actions due to poor training and verification procedures.
- ✓ Excessive documentation and lack of focus due to over-complex systems.
- ✓ Poor validation and verification due to lack of expertise.
- ✓ Over complication of HACCP implementation

## SQF Packaging Food Safety Management System

When a business has a good understanding of Food Safety principles and has the commitment and resources to carry them out, a Food Safety Management System will deliver the promised benefits. Small to medium organisations found in the food industry, have fewer resources compared with large companies, and so find it difficult to implement an effective system.

The SQF Packaging Food Safety Quality Management System is designed to help organisations tackle the task of implementing an effective system and progress to certification. The SQF Packaging Food Safety Quality Management System gives organisations a head start in developing their system and preparing for certification.

The system includes Food Safety Procedures covering a comprehensive range of prerequisite programmes which enable an organisation to put in place fundamental food safety procedures that are compliant with SQF Modules 2 & 13. The system also provides guidance on how to manage and implement a HACCP system and determine critical control points (CCPs). This process is aided by our implementation training guides and checklists which completely simplify the implementation process.”

As a bonus our SQF Packaging Food Safety Quality Management System is backed up by expert support which is always available to provide assistance in developing the system.
